

CODER

Coder Applications:

The Coder was primarily developed for easy and low cost marking. With its compact design, the Coder can be used in a great variety of applications either as a single solution or integrated with a positioning system, depending on the requirements of the system in question.

Specifications:

Print area:	40 x 40 and 50 x 50 mm
Capacity:	Max. 60 cycles / min
Installation:	Installs easily in all positions
Application:	Codes required data onto packaging substrates, products etc. such as expiry dates, lot numbers, batch numbers, week numbers etc...

Designed for integration with:

- Vacuum packing machines
- Bag form and fill seal machines
- Labelling machines
- Traysealers
- Filling machines

To print on:

- Paper
- Foils (hard and soft)
- Aluminium and aluminium compound foil

Function:

The Coder functions as a Flexographic printer with a pneumatic cylinder and utilizes rubber types, plastic types or rubber clichés as a data medium. The ink is extracted from the cartridge by a pneumatically powered swivel print head and transmitted onto the substrate in question with positional precision.

Accessories:

Rubber types and Rubber clichés

- Rubber types A-Z or 0-9 in various fonts and sizes.
- Rubber clichés for larger print layouts.

Cartridges

- 40 x 40 and 50 x 50 mm
- Standard colours: blue and black
- Special colours: yellow, red, green and white upon request
